

Gerflor Mipolan SPM Wall System Installation Class

Combining beauty and resilience with an easy-cleaning, antimicrobial surface, the Mipolan Wall collection offers homogeneous wall protection for high-traffic and hygienic environments.

A rising demand for sanitary, integral floor and wall systems has landed right in INSTALL's wheelhouse. These wall systems are made by the same manufacturers that produce the floor coverings that INSTALL has installed for years. These flooring manufacturers are all very familiar with INSTALL and have been a part of a long symbiotic relationship. Installations of these wall systems requires the professionalism, talent and attention to detail that INSTALL Certified Installers are known for. Manufacturers know that the highly trained Certified INSTALL Floorcovering Carpenters of the UBC. (United Brotherhood of Carpenters) are a perfect fit to install these types of projects.

The INSTALL Training Center here in St. Paul MN recently hosted a Gerflor Mipolan SPM Wall Panel training session for INSTALL warrantee contractor Beckers a Diversified Company UBC member Joe Rogos with HLS Consulting represented Gerflor and did a masterful job instructing the 3 day class. The class included installation of 25 sheets of Gerflor Mipolan SPM. First on a custom built wall mockup (built by UBC Carpenter Apprentices of course) and then the entrance of our Training Center, where it will showcase the durability of the product and the talent of our installers for a long time. (see the before and after pics below). The installation of the wall panels involves a special bending tool used to form the panels to fit the corners of the walls. Once cut, formed and adhered to the wall it was time to showcase why INSTALL Floor Coverers are the perfect choice for these installations. It was time to break out the heat welders! All of the seams on this system are heat welded. Sheet to sheet, sheet to floor, etc. Our highly trained, skilled and experienced installers made the transition from heat welding on the floor to welding on the wall with ease! So when selecting a installation crew for these wall systems the choice is clear INSTALL warranty contractors.
